

# Let's Protect the Environment Together!

Be a part of this year's District 7390 Day of Service - Focus on the Environment, on Saturday, April 25. Scan the QR Code to submit information about your project!

The District will publish a list on the website and in the newsletter so other know how we are protecting the environment with Rotary's seventh area of focus: The Environment.

If possible, please schedule your event on or near April 25. If you don't have an environmental project yet, consider teaming up with other clubs or local groups on projects such as tree planting, stream or road cleanups, reducing food waste, trail maintenance, starting a pollinator garden, and battery recycling.

Please complete this form by March 31!

**For ideas and resources regarding projects, scan the QR Code to visit the Environment Committee webpage.**

In 2020, Rotary International added the Environment as its 7<sup>th</sup> Area of Focus. District 7390 has a rich history of clubs supporting the environment long before the Environment focus area was added, with several clubs forming a Preserve Planet Earth Committee nearly 35 years ago in the early 1990s.

The District's Environment Committee is relatively new, but we are committed to:

- Inform individuals and clubs of opportunities. **Get involved** with environmental projects that can make a difference in our communities
- Identify resources and materials needed to **help plan and make a project a success**
- **Connect Rotarians** with similar environmental interests and
- **Celebrate** completed or planned environmental projects in our District.

**ENVIRONMENT**
